FREE TEAR-OUT SHEET // BEYOND 72 HOURS UK SURVIVAL HANDBOOK

72-HOUR HOME UTILITY & STOPCOCK AUDIT

Fifteen minutes. One pen. Know where every shut-off in your home is **before** a burst pipe, power cut or gas smell makes you hunt for it in the dark.

STEP 1 // FIND & TEST YOUR SHUT-OFFS

ITEM	WHERE IS IT? (WRITE IT DOWN)	FOUND / TESTED	TAGGED
Water stopcock (often under kitchen sink)	_____	☐ Found ☐ Turns	☐
Second stop tap (flat / upstairs / outside tap)	_____	☐ Found ☐ Turns	☐
Street water valve / meter	_____	☐ Found	☐
Gas emergency valve (next to the meter)	_____	☐ Found ☐ Lever known	☐
Electric consumer unit (fuse box / main switch)	_____	☐ Found ☐ Main switch	☐
Boiler & heating controls	_____	☐ Found	☐
Water tank / hot cylinder	_____	☐ Found	☐

Tip: turn the stopcock off and on once. Many are stiff or seized. If yours won't move, ask a plumber to replace it before you need it. Tag each item with a bright label.

STEP 2 // THE FIVE THINGS THAT FAIL FIRST

01 GAS BOILER

Needs mains electricity for fan, pump and controls. No power usually means no heating or hot water.

☐ Warm room picked ☐ CO alarm tested

02 TOILET

No mains water = no flushing. Don't spend drinking water on it.

☐ Bucket + bin liners ready

03 PHONES & BROADBAND

Masts and Digital Voice landlines can drop out in a regional power cut.

☐ Numbers on paper ☐ Power bank charged

04 FRIDGE & FREEZER

Keep doors shut. A full freezer holds temperature longer than a half-empty one.

☐ Fridge thermometer

05 CARDS & CASH

Shops can't take cards if their systems are down.

☐ Small notes in a safe place

QUICK WATER CHECK

Plan about **3 LITRES PER PERSON PER DAY**. 3 days for you: _____ litres stored.

☐ Stored ☐ Dated

STEP 3 // EMERGENCY NUMBERS (FILL IN & PIN UP)

Power cut	**105** (free, UK-wide)	Gas emergency	**0800 111 999**
Non-emergency health	**111**	Life-threatening emergency	**999**
Water company	_____	Gas / electricity supplier	_____

SAFETY // READ THIS

Smell gas? Don't use switches, flames or phones indoors. Open doors and windows, turn off the gas at the emergency valve if safe, leave the property and call 0800 111 999. **Never** burn charcoal, barbecues or camping stoves indoors: carbon monoxide kills.
